For environmental reasons, where possible, could you please bring your own carrier bags to events

2020 was a strange one for us all. However with Storm Ciara removing the cover from our polytunnel we didn't have the best start! We were unable to act as an assessor for the RHS Trials of Sanguisorba, or the Persicaria trials. Our diary of plant fairs and specialist events showcasing our wide range of Epimediums (2018 Chair of RHS Roundtable for Epimedium AGM awards) were also suspended, but it gave us an opportunity to cope with the large volume of mail orders! Fortunately we were able to attend a few plant fairs towards the end of the year. Many of these events have been rebooked for 2021 (locations and dates itemised overleaf). We now open the nursery by appointment too. Please telephone or email first and we'll do our best to accommodate you.

We offer a **wide** range (generally in small quantities) of interesting and garden-worthy plants, including many shade lovers, especially Epimediums, ferns and perennials. We propagate most of the plants ourselves, using peat free compost, and as organically as practicable. If you would like a specific plant (or plants) brought to a venue, please ring or email.

We are also available to do a range of talks to groups as well as interactive workshops on propagation.
